

PRATYUSH ROBERT

Backend Developer | Cybersecurity

+91 87915 33725 | pratyushrobert2379@gmail.com | Ghaziabad, India
[Linkedin](#) | [GitHub](#) | [TryHackMe](#)

PROFESSIONAL SUMMARY

B.Tech CSE student focused on cybersecurity and backend development, with hands-on experience in web application security, vulnerability assessment, and secure API development. Skilled in Python, Node.js, React, and MongoDB, with practical cybersecurity experience through TryHackMe, penetration testing labs, and security-focused projects. Interested in offensive security, web application penetration testing, and building secure systems.

EXPERIENCE

WAPT Intern, Iqrsec Academy
Ghaziabad (Remote)

sept 2026 –Present

- Assessed web applications for vulnerabilities and security misconfigurations.
- Performed penetration testing and vulnerability analysis using security tools.

Technologies: Burp Suite, Nmap, OWASP ZAP, Linux, SQL, JavaScript, HTTP/HTTPS

Team Leader, Smart India Hackathon (SIH 2026)

Jan 2025 – Nov 2025

Ghaziabad (Hybrid)

- Led a 5-member team building an AI-based solution for a national-level hackathon.
- Coordinated team tasks, assigned coding work, and drove project delivery.

Technologies: Node.js, React, Flutter

Technical Head, Computer Science Student Society (CSSS), RKGIT

Jul 2024 – Present

Ghaziabad (Hybrid)

- Represented the society in hackathons and coding events, and contributed to society projects.
- Wrote C++, Python, and JavaScript code for development tasks across the society's projects.

Technologies: Node.js, React, Python, MongoDB

PROJECTS

BETTER – AI-Powered Emergency Response Platform | GitHub

- Prototyped a community-driven emergency reporting platform with AI-assisted verification and location-based alerts.
- Engineered 4 core features: incident reporting, media uploads, GPS location sharing, and real-time notifications.
- Prioritized secure data handling, backend integration, and scalable system design.

Technologies: Flutter, Node.js

HENNGE Backend Challenge

- Solved a strict-constraint problem with a recursive Python solution using no loops.
- Generated time-based one-time passwords (TOTP) per RFC 6238 using HMAC-SHA512.
- Sent authenticated API requests using HTTP Basic Authentication.

Technologies: Python, Linux, Networking, Bash

TryHackMe Advent of Cyber 2025 – Cybersecurity CTF

- Completed hands-on challenges in web security, cryptography, networking, and system exploitation.
- Analyzed vulnerabilities and simulated attacks in Linux environments.
- Applied security tools and defensive security concepts to solve practical challenges.

Tools: Linux, Wireshark, Burp Suite, Nmap

EDUCATION

Raj Kumar Goel Institute of Technology (RKGIT), AKTU – Ghaziabad

Expected 2027

B.Tech in Computer Science | CGPA: 5.7

Ingraham English Medium School (CBSE) – Intermediate

2022 – 2023

Percentage: 60%

Ingraham English Medium School (CBSE) – High School

2020 – 2021

Percentage: 76%

SKILLS

Programming Languages: Python, JavaScript, C++, SQL

Frameworks & Libraries: React.js, Next.js, Node.js, Flutter

Databases: MongoDB, MySQL, Firebase

Security & Networking: Wireshark, Burp Suite, Nmap, Networking, TOTP (RFC 6238), HTTP Authentication

Tools & Platforms: Git, GitHub, Linux, Docker, Bash

Professional Skills: Leadership, Teamwork, Communication, Problem Solving, Critical Thinking

Spoken Languages: Hindi, English

AWARDS & CERTIFICATIONS

- Recognition – International Hackathon (HackerEarth)
- Oracle Cloud Infrastructure 2025 AI Foundations Associate – Oracle
- Advent of Cyber 2025 – TryHackMe
- Pre Security - Tryhackme
